UI Designer

Are you a talented UI designer looking to impact billions of lives? Come join us at Virufy.org, a not-for-profit social venture with the goal to transform your smartphone into a COVID testing kit, through analysis of cough, breathing, and other signals. We are a thriving student-led organization advised by Stanford medical faculty and clinical research staff and have governmental/NGO networks in 190+ countries waiting for our solution.

Role Overview

We are looking for a UI designer who is passionate about designing web and mobile platforms and creating user-friendly apps. You will be collaborating with our engineers to develop and maintain the UI for high quality mobile-friendly applications to be used by millions of people.

Responsibilities

- Help build functional mobile apps on Android (and iOS) for data collection and prediction
- Collaborate to design a consistent user interface and improve user experience
- Ensure apps meet Google Play Store and Apple App Store standards
- Create wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- Write unit and UI tests to identify malfunctions and optimize performance
- Stay up-to-date with new technology trends, mobile products, applications and protocols

Requirements

- Proven work experience as a UI designer for mobile and web apps
- Excellent visual design skills with sensitivity to user-system interaction
- Demonstrable portfolio of released applications on the App store or the Android market
- Excellent analytical skills with a good problem-solving attitude
- Ability to perform in a team environment
- Good to have
    - Experience with HTML and CSS
    - Experience with design software such as Figma and Canva
    - Experience with a front end JS framework such as react, vue or angular

Time Commitment

15+ hours per week, ideally over the next 3 months

To Apply

Please fill out our Google form and feel free to reach out to join@virufy.org with any questions.
